

Electronic manuel labeler

The very light **electronic hand labeler** allows fast and simple labeling with different label sizes.

Powered by a rechargeable battery (or direct 110V power supply), the machine allows freedom of movement.

The photoelectric cell is connected to an electronic card, allowing you to control the flow of labels step by step.

Technical Data

- Battery: 6V, placed in a case which can be w
- Battery life: 30,000 Labels for 2 batteries
- Charging time: 4 hours
- Weight: 470g (without label roll)
- Dimensions: 230 x 185 x 80 mm
- Outer diameter of the roll: 100 mm maximum
- Inner diameter of the roll: 50 mm
- Number of labels per roll: between 1,200 and
- Type of labels: paper, polypropylene
- Label thickness: 60 microns
- Label colours: all except transparent
- Speed: 300 labels/minute
- Labels are applied when the roller touches the fruit
- Plastic ABS case that is highly resistant, dual-color diode indicates the battery charge level

The pack includes:

1 ML, 2 NIMH 3.7 Ah batteries, 1 battery charger, 1 AC adapter (110V/6V).
