

Pneumatic manuel labeler

In order to keep labeling costs at a low level, AMERICA LABEL offers its **manuel labelers** that can be used very quickly without any special training. They work with compressed air and are quite light and very tough.

The MP200-2820 machine is made for the application of 28 x 20 millimeter labels on melons and other large fresh produce.

A pressure regulator is required for each machine.

Technical Data

- Weight: 400 g
- Connection to the pneumatic network through a non-lubricated regulation filter calibrated between 2.5 bar (36 PSI) and 3 bar (44 PSI)
- The label is applied when the roller touches the fruit
- Working speed: from 150 to 200 labels per minute
- ABS resistant plastic case
- Component parts made of plastic and stainless steel
- 3 possible configurations:
 - 16 millimeter strip width for small oval labels (20 x 13 millimeters)
 - 30 millimeter strip width for large oval labels (28 x 20 millimeters) for melons, pomelo, etc.
 - 20 millimeter strip width for all other label sizes (24 x 14, 22 x 17, 15 x 15, 23 x 16, ...)
- Reels contain 1,925 labels
